

**RESIDENTIAL CARE**

## RESIDENTIAL CARE

---

Welcome to the new Residential Care Home brochure from Lockhart Catering Equipment. As the UK's leading distributor of catering equipment, our vision is 'To bring innovation and inspiration to the preparation and presentation of food'.

However, we recognise that to deliver that vision fully we need to understand the specific needs of individual sectors and shape our offering to their requirements. In putting this new brochure together we have spent a lot of time talking to customers throughout the Residential Care sector in the UK to develop an in-depth understanding of the challenges they face in preparing and serving food to their residents.

With over 17,000 care homes in the UK and almost half a million residents being looked after, the total number of meals being prepared and served each day is huge and this places an enormous amount of pressure on the in-house catering teams. Adding to that pressure is the fact that residents will have a wide range of medical and nutritional needs all of which need

to be allowed for. In addition, many residents will also have regular visits from family members and catering for their needs places further demand on already busy teams.

Over and above these day-to-day pressures there is also the need to compete in an increasingly demanding market and many customers have spoken to us about their desire to innovate and offer residents a more aspirational living experience. As our population continues to age and live longer many older people are seeking to maximise their quality of life even after they have left the comfort and security of their own homes. This places even greater pressure on Residential Care Homes to provide a very high standard of catering throughout the day.

This brochure aims to provide practical and person-centred care solutions for all these differing needs by focusing on five specific areas that our research with Residential Care Homes has identified as representing the main challenges their catering teams face on a daily basis.

# SUPPORTING DIGNITY & INDEPENDENCE

### SPECIALIST PRODUCTS

Many Care Home residents will have specific medical needs that mean conventional tableware products are not suitable for them. The specialist product range from Lockhart is designed to address a wide range of practical issues ranging from restricted mobility through to visual impairment and dementia to ensure that they are offered tableware that will help to support their independence and well-being as well as maintaining their dignity and self-esteem when eating. This selection of products will provide you with a range of person-centred care solutions.

### CENTRAL DINING

The Central Dining area is often the social hub of a Residential Care Home where residents can experience a home-from-home environment which can really help their mental and emotional well-being. Research has also shown that a homely, sociable dining experience can also increase the feeling of community for residents and create a sense of well-being that can actually increase their nutritional intake. But the presentation of the actual food itself is key to delivering these benefits so we have put together a carefully selected range of products designed to help you provide your residents with the welcoming and uplifting dining experience they deserve.

### IN ROOM SERVICE

While many residents will enjoy the social experience that central dining can offer, there will be times when they might need the peace and quiet of eating in their own room. The calm and comfort of eating in a familiar safe space may sometimes be an important element of caring for someone with dementia or anxiety issues. Our In Room Service range includes both tableware suitable for serving the food as well as a range of products offering effective food transportation and heat retention.

## SUPPORTING DIGNITY & INDEPENDENCE

### TIME FOR TEA

The opportunity for residents and visitors to meet up over a cup of tea (or coffee) can be one of the most important social interactions of the day. Whether it's a formal afternoon tea with cakes and scones or just the chance to sit down for a cuppa and a chat, making some 'Time for Tea' can provide residents and their families alike with the perfect opportunity to get together. Our carefully selected range of products includes everything you could possibly need to serve a range of beverages and cakes including vacuum jugs and airpots to ensure hot drinks are available whenever residents or guests require them.

### FOOD TO GO

Inevitably regular or fixed mealtimes won't suit all Care Home residents and it will be necessary to offer a more flexible Food to Go service. For some this will be about allowing them to eat when they feel they can or to eat less but more frequently throughout the day. In addition, food to go products are essential in packing meals for residents' hospital appointments and providing takeaway food to visitors and staff. So, Food to Go option requires a range of serving solutions that encompass solutions for hot and cold food as well as snacks and drinks. Our Food to Go section covers everything you are likely to need with both disposable and reusable options as well as paper bags for transportation.

So, whatever the requirements of your in-house catering teams, we can provide a carefully selected range of products that are perfect to meet the needs of busy vibrant Residential Care Homes and will offer your residents the dining experience they deserve.

DYSPHAGIA

Page 20

## SPECIALIST PRODUCTS

These specialist products are designed to help residents maintain their independence by providing innovative solutions to assist them with eating and drinking. With discrete features, they are designed to empower residents who require additional support, allowing them to eat independently and make their mealtimes more enjoyable. Tailored for individual personal needs, this range offers a range of practical options for assisted living.

From specialist tableware collections designed to help with a wide range of conditions through to products that can be used to prepare suitable food for residents suffering from dysphagia, we can supply a comprehensive range of solutions to help Residential Care Homes manage a variety of issues discreetly and effectively.

Importantly these products are not simply functional and are designed to maintain the dignity of the residents using them. The Churchill and Steelite tableware ranges, for instance, are designed to resemble existing collections so that they will blend-in seamlessly as part of an overall table-setting and not draw attention to their use. This helps to significantly reduce the stigma of having to use specialist products for the user.

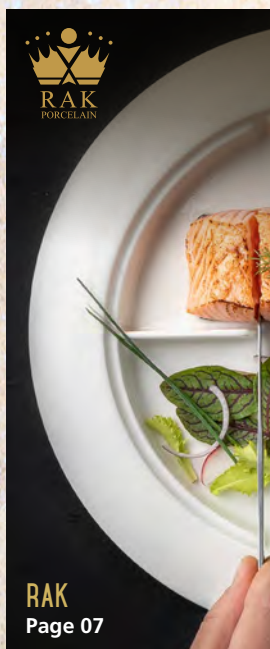

"As per Boston University's research in 2004, Dementia sufferers' food intake increases by 25% and liquid intake increases by 84% when high contrast tableware is used."

## SPECIALIST TABLEWARE

This is a specialist range of products to support residents' dignity and independence. Products are designed to assist residents with restricted mobility, vision impairment or dementia.

With special features such as plates with underside lips for better grip and cutlery with curve rim profiles to catch overspill, each product is carefully selected to help improve residents' nutrition and hydration.

If you're looking for coloured tableware for residents' easy identification, we've covered that too.

## RAK SENSATE

These products from RAK provide innovative solutions that enable stroke victims and people with upper-limb disabilities to eat independently. They are designed to provide a multi-functional plate partition, which allows the user to cut bites of food in any size, regaining a sense of pride and independence. The collection features a range of sensory elements that guide the user and enhance the dining experience.

### FEATURES:

- By sliding the utensil between the gap of the partition, users can easily cut through their food using one hand.
- The sensory guide is a small indent on the rim of the plate that allows users with vision impairment to easily locate the partition.
- The depth of the plate coupled with the partition allow the user to scoop up their food easily.
- A wider, smoother handle for an easier more ergonomic grip. Designed for all hand sizes; the slanted line provides pinky support for users with bigger hands.
- The slight edge on the inside of the bowl acts as an indicator for users with visual impairment. When scooping along the inner wall, the edge signifies to the user to stop.
- Bowl features an ideal curvature for scooping and containing the food in the centre of the bowl, where it's most visible.

# CHURCHILL FUTURE CARE

This collection from Churchill is ergonomically designed to support independent needs to improve food intake and nutrition.

The deep plates aid eating with use of an undercut to ease food on to the cutlery, and a contemporary wide rim to assist stability and handling. The flat base plates are designed to have full contact with a heated tray, retaining heat and keeping food hot for longer. The stacking cups and mugs are design engineered to provide additional grip and stability with a wide base and functionally designed handle to support good hydration.

Microwave & Dishwasher Safe. All items have been designed to fit easily into a dishwasher.

### FEATURES:

- High rim to help the food fall back on the cutlery, no need for food guard
- A wide base for excellent stackability and storage.
- Wide rim to assist stability and handling

### PLATE

# CHURCHILL FUTURE CARE

Churchill Future Care is available in blue to improve residents' food intake and nutrition. Care industry experts have identified that food is more visible against the contrast of blue tableware and contrast colours make food look attractive on the plate for individuals to eat better.

## FEATURES:

- Wide and coupé rim aids handling and stability
- High rim to help the food fall back on the cutlery, no need for food guard
- Designed to have full contact with a heated tray, retaining heat and keeping food hot for longer
- Low plate height for an easy fit into racking systems and heated trolleys
- Porcelain body for excellent performance and durability

# STEELITE FREEDOM

All Steelite Freedom product design features address problems that individuals may face with restricted mobility.

The plates feature a cleverly designed undercut shoulder which is helpful in getting the food onto a spoon or fork. This greatly enhances the ease of eating without assistance. A wide food area adds stability and helps to hold the plate in place during a meal. The curved rim profile catches any tricky overspill and prevents foods from slipping onto the tabletop.

The mug features two sturdy handles large enough to accommodate unsteady fingers and enabling a steady satisfying drink. A wide base on the mug means easy placement after drinking and the avoidance of spillage. All ceramic items are available in pure white and a range of cheerful colours which aid recognition of the food surface.

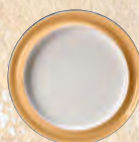

## FEATURES:

- A mixture of Melamine and Ceramic product, designed to integrate seamlessly
- Plates designed with undercuts to aid eating without assistance
- A wide food area allows for additional stability
- Undercut shoulder which helps in getting the food onto a spoon or fork.
- The curve rim profile catches any tricky overspill.

# DALEBROOK OMNI

This is a unique and innovatively designed premium melamine tableware solution from Dalebrook to support independence and promote dignity.

With OMNI Deep Edge Dinner Plate and Deep Edge Side Plate, you can easily replace the need to use a separate food bumper. The deep internal wall aids diners who may push food off the plate because of a lack of coordination, limited muscle control or dexterity. Features include stable anti-slip silicone feet, muscle memory sensory points, deep internal wall, wide rim for grip, nestable for ease of storage and a great insulator so no need to pre-heat.

## FEATURES:

- Made of lightweight melamine to aid independence and reduce noise during service
- Deep internal wall helps reduce the need for a plate guard
- Sensory bumps for muscle memory
- Silicone feet to reduce slip
- High contrast rim to help aid with visual impairments
- Saucers have a raised dome in the middle which fits with a dome on the bottom of the mug to allow for ease of mug location
- Lids designed with room for nose space to reduce neck movement

# AFIA DIGNITY

Dignity plates and bowls are designed with an extended rim to help in the scooping and lifting of food, whilst reducing the danger of spillages.

Teapots are designed with 2 large handles which ensures ease of grip when lifting, and steadying when pouring.

Egg shaped saucer design allows it to be carried easily with space to put a biscuit/cake on the side, the well of the base is deep to hold the mug in place and steady while carrying.

Flower vases can hold flowers to enhance the table, with a split one side to hold a menu.

## AMEFA CUTLERY

Hand and wrist issues can make it difficult to eat and enjoy meals, but Ameфа range of cutlery made it possible to eat confidently and with dignity. The range features a left handed fork and spoon and a right handed fork and spoon, that have unique, curved handles for an easy grip. They are designed with wide heads, so the forks and spoons can scoop up food easily. The knife is available with a straight or L shaped handle to be able to simply rock or slice through foods.

### DISABILITY CUTLERY

- Unique, curved handles for an easy grip.
- Wide heads so the forks and spoons can scoop up food easily.
- Knife designed to allow for a rocking motion to cut food.
- 18/10 Stainless Steel

### INTEGRALE

- The unique Ball shaped end allows for residents to grip the cutlery in a way that is more comfortable for them
- Standing design makes the cutlery easy to lift off the table
- Knife designed to be used with either a sawing or rocking motion, meaning less force needs to be applied

# DYSPHAGIA

This range of products will help you to offer person-centred care to residents with swallowing difficulties and protect them from choking, malnutrition and dehydration. From requiring food preparation items such as moulds to give texture to food, to triturators to prepare puree for residents to reduce efforts required for chewing, we have carefully selected items to meet those specific needs.

## The IDDSI Framework

Providing a common terminology for describing food textures and drink thickness to improve safety for individuals with swallowing difficulties.

"According to the Med Diet survey, adding varied textures to puree food increases interest to eat."

# TELLIER TRITURATORS

## TRITURATORS & SIEVES

To prepare purée, stewed fruit, fish soup, vegetable soup, etc.

# CENTRAL DINING

---

## CENTRAL DINING

Comfort and familiarity are key to creating a 'home-from-home' atmosphere for residents. Having an impressive central-dining area means both residents and their loved ones will instantly feel welcome to an environment that is both familiar and safe. Research shows that an inviting dining area encourages residents to use the space more often for socialising and having their meals, which can positively impact their physical and mental well-being. We understand that you want your residents to feel at home, give them a dining experience to enhance social interaction, build a sense of community and increase nutritional intake.

So we have put together a range of tabletop products to help you create the dining experience your residents deserve. With an emphasis on smart but casual dining, our selection includes both conventional white tableware for a more traditional look through to ranges that reflect the latest trends in colour, shape and texture. We have also included a number of stylish but practical melamine options as well as all the other accessories and table service items you are likely to require.

# CRÈME

Crème is widely used by residential care homes in the UK.

This tableware range is simple, refined and combines a perfectly balanced ivory colouring with innovative shapes and profiles. Never before has tableware of such distinctive style and quality been available at prices offering such extraordinary value for money.

Crème is produced from the best ceramic materials available anywhere in the world. Using only the finest European clays, and a high content of alumina, Crème has achieved not only a perfect colour but also world-class levels of performance for strength and durability. Crème only uses the finest 100% lead-free glaze to ensure that your tableware continues to look as good as the food being presented on it. Crème is exclusively manufactured in a world-class facility that has been awarded ISO9001 for quality management and ISO14001 for environmental management.

## ARIANE (FOR FINE DINING)

Ariane is a pure white fine porcelain collection of tableware and is used by many four and five-star hotels.

Ariane offers an exquisite combination of purity, finesse and strength that will bring a palpable sense of refinement, providing your residents with a greatly enhanced fine dining experience. Ariane is a true porcelain range, free from artificial fluxes and fillers. It uses only the purest China clays, China stone and the highest grade of alumina to bring a unique level of durability. The Ariane glaze is 100% lead-free and only the very best materials are used. Glaze is applied with the absolute latest German automated glaze dipping cell. Each single piece of Ariane is foot polished using a diamond polishing machine to ensure a glassy smooth foot to prevent any scratching.

Ariane is exclusively manufactured in a world-class facility that has been awarded ISO9001 for quality management and ISO14001 for environmental management.

## ARC TABLEWARE

Arc products are easily transportable and can be stored on meal trays. They are light weight to reduce the risks associated with musculoskeletal disorders, shock resistant to ensure the safety of residents and ergonomic for ease of handling. Products are stackable for optimal use of storage.

### HIGH SHOCK RESISTANCE

Up to 3 times more shock-resistant than porcelain: the secret of its unbeatable durability.

### THERMAL SHOCK RESISTANT

Opal Glass products are resistant to variations in temperature of 130°C: they can thus be removed from the oven (or from a salamander) and placed directly in to cold water without the risk of breakage.

### PROFESSIONAL 2000 CYCLES

Fade-resistant surface and pattern, even after 2,000 industrial dishwashing cycles.

### HEAT MANAGEMENT

As efficient in keeping food hot as other materials such as porcelain. (at the same thickness and weight)

### MICROWAVE SAFE

Can be safely handled after microwave use.

### PERFECTLY NON-POROUS

100% Opal, 0% porosity. 100% protection against bacteria.

TRAYS & TROLLEYS  
Page 47

## IN ROOM SERVICE

How and where a resident is served their meal has a significant influence on how much they enjoy it. Having an in-room dining option offers residents the freedom and independence to eat in their own personal space when they wish to, providing them with additional control and peace of mind when they feel they need it. This sense of control can have a big impact on how much and how often they eat.

Supporting residents with mealtime choices in a way that suits them best requires products that are both practical to use and ensure residents' comfort while they are eating. But equally the staff serving them also need safe practical ways to transport the food that will ensure it is delivered ready to serve, whether that means keeping the food hot or cold.

Our range of in-room dining products offers exactly that combination. From stylish and durable tableware, heat retention systems, trays and a wide-range of versatile service trolleys, our selection is designed to offer you a comprehensive solution for all your in-room dining service needs.

## PLATE COVERS

# TIME FOR TEA

.....

## TIME FOR TEA

Having areas within a Residential Care Home where residents, families and friends can meet in a relaxed and vibrant tearoom environment can play a vital part in creating a sense of well-being. A lively, comfortable area provides residents with a reason to come out of their rooms and socialise with others which is incredibly beneficial for their physical and mental well-being. Creating the right environment for people to sit down and have a cup of tea (or coffee) has the potential to turn the experience of visiting a loved one into a positive one for residents and guests alike, thereby improving and enhancing relationships.

Our range of products will ensure that you have everything you need to create that perfect setting. Whether you want cups and saucers with a modern or vintage look, cutlery, teapots or cake stands we can provide a range of options to suit all occasions. Serving tea or coffee nice and warm is essential so our range also includes a selection of vacuum jugs and air pots to ensure everything is kept at the correct temperature. Finally, where a self-service option is required we can provide a range of beverage machines and drinks dispensers.

## FOOD TO GO

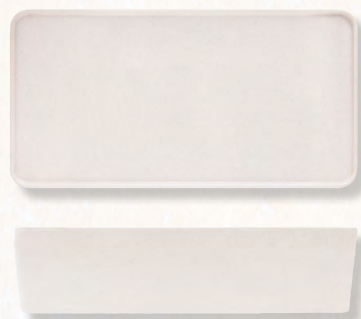

'Food To Go' meal options are a great way to encourage people to eat at a time that is best for them. For people who do not enjoy eating much during regular mealtimes and prefer to eat smaller but more often during the day, a Food to Go meal service allows them to have increased independence in their eating habits. Carefully selected and properly prepared Food to Go options can be as nutritious as traditionally cooked meals providing residents with the nutrition they require.

Our Food to Go range is perfect for serving both hot and chilled food and offers high-quality construction and effortless practicality from the point of fill through to consumption and disposal. Whether residents simply want drinks and snacks, healthy salads or soups right through to substantial main course meals, we can provide suitable options to suit all requirements including napkins and bags to carry everything in. We also offer specific products under our 'Sustain' brand that are fully recyclable as well as a wide range of reusable containers.

## Making meals that matter.

Working in tandem, the RATIONAL iVario Pro multinational cooking system and the iCombi Pro deliver all the cooking processes you need, with lower energy consumption and running costs than traditional cooking systems.

The intelligence of RATIONAL cooking systems takes the hard work off your hands, thinks along with you and always produces your desired result so that vitamins, taste, texture and appealing colour are served every day.

Worthwhile investment – you can look at it from any angle you want, the numbers work.

iCombi Pro and iVario Pro not only cook intelligently but they also save intelligently - such as energy consumption, workload, space requirement or raw materials, and oil consumption. In short, the results are impressive.

Reduce energy consumption. Produce high-quality dishes in a shorter time and with minimal staff. Improve day to day kitchen operations.

↓ 70%

### Up to 70%\* lower energy costs

Short preheating times eliminate the need for standby mode. Rolling loads with the iProductionManager in the iCombi Pro, zoned heating of the pan with iZoneControl in the iVario Pro also save energy.

↓ 1-2hrs/day

### Less working time\*

It eliminates the need for routine tasks such as turning, checking and readjustment. Ultrafast cleaning in the iCombi Pro and super easy cleaning in the iVario Pro save time. Makes 1-2 hours of extra free time per day.

↓ 30%

### 30%\* less space requirement

Together, the iCombi Pro and iVario Pro replace approx. 90 % of conventional cooking equipment. So out with the tilting pan, boiling pan and deep-fat fryer – and in with freedom of movement. Or additional floor space.

↓ 25%

### Up to 25%\* less consumption of raw materials

The iCombi Pro sensitively adjusts its cooking processes which reduces weight and cutting loss. Nothing burns in the iVario Pro, and nothing boils over. This results in almost no loss at all. Together, this makes up to 25 % less consumption of raw materials.

## SEE FOR YOURSELF - Attend RATIONAL Care Home Live online

Discover the benefits of the RATIONAL cooking systems:

- Sustainability, energy efficiency
- Delivering rapid return of investment
- Increases productivity
- Reproduce high-quality dishes every time
- Easy-to-use functions + onsite training & support for the team
- Self-monitoring – making your life easier!

The event lasts for approximately 45 minutes. You can access via your PC, tablet, laptop or smartphone. An expert RATIONAL host is on hand to answer any questions you may have and ask about our current promotions.
